Subject: Tell Gov. Cooper: No Permit for Atlantic Coast Pipeline!

Building People Power for Climate & Energy Justice

Urge DEQ to Deny 401 Water Quality Permit for the ACP

The NC Department of Environmental Quality is due to decide by Monday, Sept. 18 whether to grant the Atlantic Coast Pipeline its NC 401 Water Quality Certification. The application for this massive, fracked natural gas pipeline proposed by Duke Energy and Dominion Resources is completely inadequate to protect NC's waters and people.

[Email Gov. Roy Cooper and
DEQ Secretary Michael Regan](#)

and tell them not to grant the 401 permit

Remind them of the economic, environmental and social justice reasons that this pipeline is completely unjustified and will be dangerous, damaging and costly for North Carolina. Ask them to deny the 401 water certification permit, a permit that Duke and Dominion must have in order to begin construction.

Read more [here](#) about the Atlantic Coast Pipeline, a key to Duke Energy's huge expansion of climate-busting fracked gas in North Carolina.

Now in its 29th year, NC WARN's mission urgency is to induce Charlotte-based Duke Energy – one of the world's largest corporate utilities – to make a strong shift to clean, affordable energy in order to stem pollution's damage to communities, and to help avert climate tipping points and ongoing rate hikes.
